LT2 Standards Calendar
As of 3 Jan 2013
BDE 27 A27
TIE-DOWN

Benefits of Standardization

Commonality
- Reduces Developmental Cost
- Promote Reuse

Modularity
- Reduces lifecycle costs
- Improves Reliability, Availability and Maintainability (RAM)

Non-Propriety
- Greater vendor depth
- Maximize industry involvement in:
  - Tech Insertion
  - Developing product-line
  - Providing Training Capabilities

Interoperability
- Live/Virtual/Constructive - -Increases training opportunities and enhances each domain
- Joint Service --Train as we fight
- Test and Training -- Reduce costs

Extensibility
- Enables modernization and embedded training

Accreditation
- Improve flexibility in addressing IA/system accreditation

Verification & Validation
- Test bed development and utilization

Live Training Standards Stakeholders

INDUSTRY PARTNERS

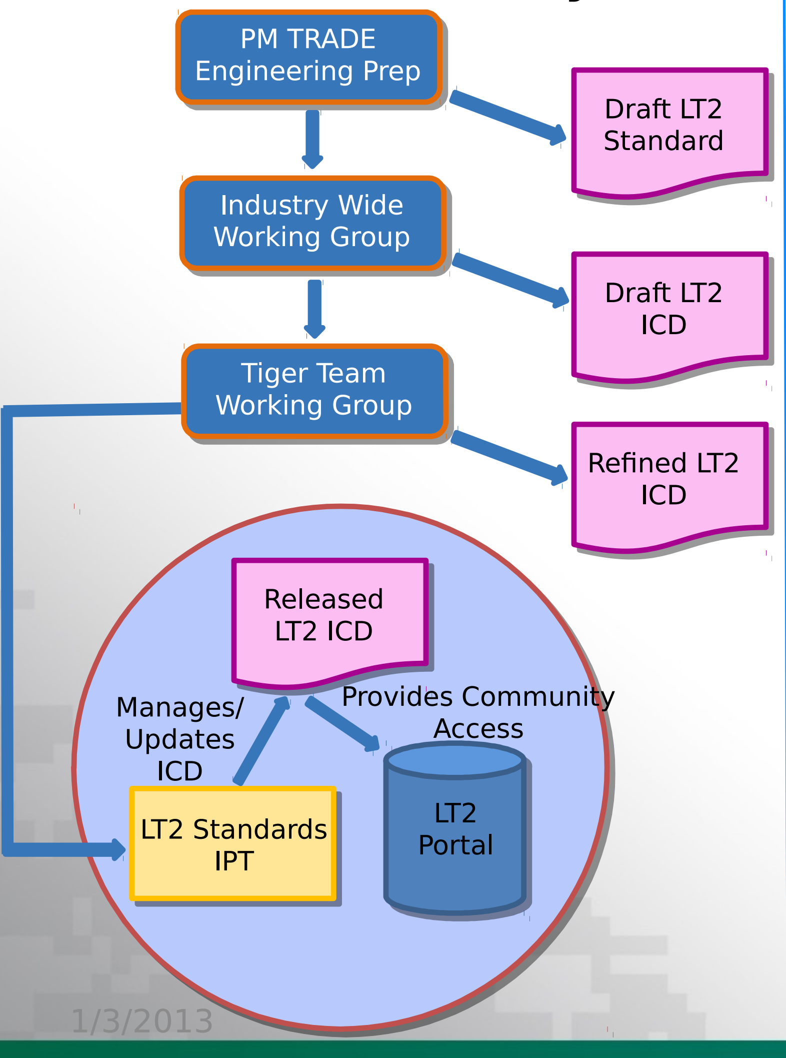

Government and industry work together to establish Live Training Standards to promote systematic reuse of software and interoperability solutions for the LT2 product line

LT2 Processes and Test Bed

LT2 Standards Life-Cycle

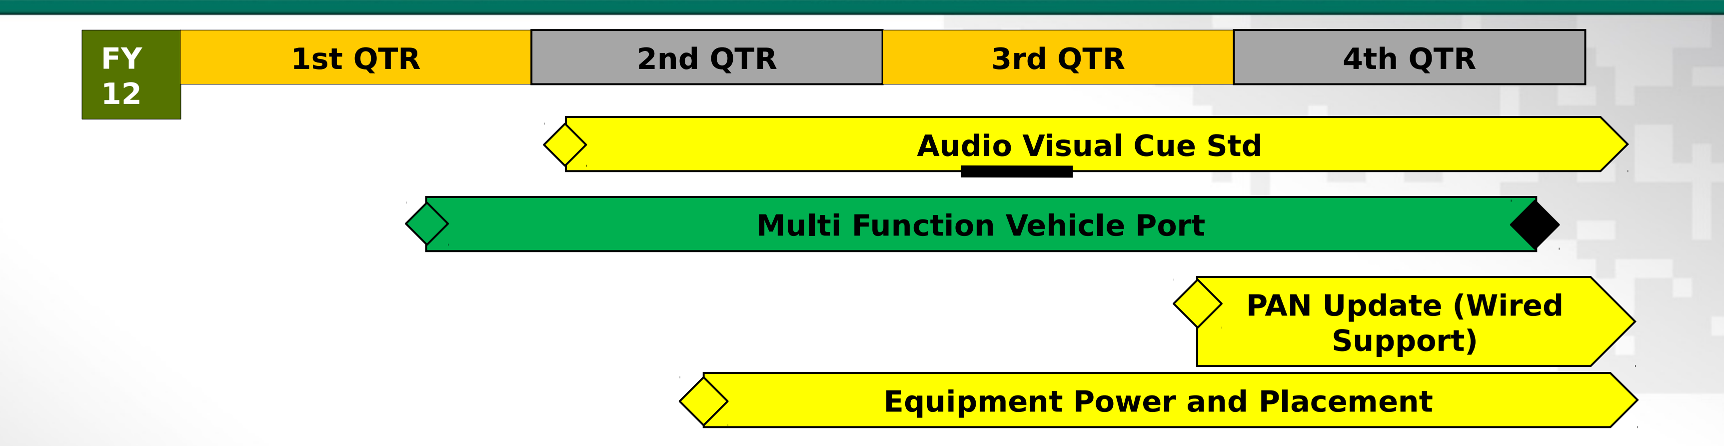

Standards and ICD's on Portal

Live Training Test Bed(s)

- Capable of supporting Instrumentation/TESS Interface Standard requirements, PAN Standard requirements, and future live training standards requirements.
- Co-located Test Bed in the Government's Integrated Development Environment (IDE).
- Will be used by Government to validate product compliance against Standards and ICDs. Also can be used by industry to test compliance of new products.
- Image available on LT2 Portal.
- Standing up new MILES test bed capability.
